## SUMMARY

---

Aspiring Full-Stack Web Developer and BSIT student with hands-on experience building responsive, user-focused web applications using React, PHP, and MySQL. Skilled in developing full-stack CRUD systems, user authentication, and clean, maintainable UI designs. Passionate about learning modern web technologies and building real-world applications.

## EDUCATION

---

### • Rizal Technological University

Bachelor of Science in Information Technology | **2022 – Present**

### • Army's Angel Integrated School

Senior High School – ICT Strand | **2020 – 2022**

## SKILLS

---

- Frontend: Html, Css, JavaScript, React
- Backend: Php, Mysql
- Tools: Git, Github, Figma

## PROJECTS

---

### DreamBooking – Full-Stack Web Application

Stack: HTML, CSS, JavaScript, PHP, MySQL

- Developed an Airbnb-style booking platform allowing users to list, browse, and book apartments
- Implemented role-based access control for users and administrators
- Built admin moderation features to manage property listings
- Integrated map-based listings to enhance location-based searching
- Designed a structured database using MySQL and implemented CRUD operations using PHP (PDO)

### PomoZone – Productivity Web Application

Stack: HTML, CSS, JavaScript

- Built a productivity web application for a hackathon project to help students manage tasks, stay focused, and track daily progress
- Implemented a Pomodoro timer with multiple modes (Pomodoro, Short Break, Long Break) and automatic session switching
- Developed a to-do list system allowing users to add, edit, delete, and track completed tasks
- Created a GitHub-style session tracker (heatmap) to visualize daily productivity based on completed Pomodoro sessions
- Utilized LocalStorage to persist tasks and session data across browser refreshes

## TECHNICAL EXPERIENCE

---

- Develop responsive web interfaces using React and modern CSS
- Build backend functionality using PHP and MySQL, including CRUD operations and authentication
- Use Git and GitHub for version control and project collaboration
- Convert UI designs from Figma into functional web pages
- Apply basic security practices such as input validation and access control
